

ERASMUS+ PROJECT "KIDS IN NATURE"

FLOA AND FAUNA

picture dictionary

We are very proud to present this "Flora and Fauna picture dictionary", which includes images of local plants and animals from 6 countries around Europe and beyond: Bulgaria, Latvia, Lithuania, Romania, Slovenia and Turkey. Each picture is made by our students in a fun and unique way, to help children discover and learn about all the rich biodiversity in their countries and all around.

In the publication next to each picture reader will find the title of each item spelled in 6 different languages. Our aim is to represent and celebrate similarities and differences between us via language as well as learn about our precious Nature.

We believe that by learning about the natural world, we can appreciate and respect it more, and develop a deeper understanding of our place within it. Our aim with this picture dictionary is to inspire other kids to share in our love of nature and join us in exploring the fascinating world of flora and fauna.

So join us on a journey of discovery through the amazing world of plants and animals!
